Leadership & Transformation: Enterprise Digital Strategy | Organizational Change Management | Cross-Functional Program Delivery | Executive Stakeholder Management | P&L Ownership (\$22MM) | Portfolio Governance

Cloud & Architecture: Azure (Entra ID, Cosmos DB, Serverless, DevOps Pipelines, Key Vault, AI Foundry) | AWS | GCP | CI/CD | DevOps | Cybersecurity

EXPERIENCE

CTO & Chief Product Owner — Protago

07/2022 – Present | Montreal

Data and AI governance platform — built team and product from zero to \$200K+ ARR.

- Designed and launched an AI platform powered by LLMs and AI agents (LangChain) to operationalize regulatory compliance frameworks, enabling clients to bring governance policies to life
- Established AI governance practices ensuring responsible AI deployment, compliance, and risk management across the platform
- Pioneered adoption of generative AI tools (Cursor, Claude Code) to accelerate development velocity and improve code quality, requirements, design, and testing
- Led global distributed team on Azure infrastructure (AI Foundry, Cosmos DB, Serverless Functions), reducing deployment costs by 50%
- Partnered with CEO/COO to align product roadmap with enterprise priorities, presenting to CEO/CRO/CFO forums

Enterprise Consultant — Manulife / John Hancock

06/2021 – 06/2025 | Boston / Toronto

Multi-year consulting engagement driving technology strategy transformation for enterprise tech services.

- Realigned cross-functional fraud prevention efforts at John Hancock, delivering \$30M+ in annual savings and doubling throughput
- Achieved 28% increase in ROI on invested capital, 2x realization of benefits, and 3x improvement in OKR attainment
- Designed CapEx/OpEx reclassification model, reclassifying 17% of OpEx to CapEx via real-time attribution — eliminating timesheets
- Introduced delivery dashboards and agile practices that doubled release velocity across the portfolio
- Chaired governance and offsite sessions, aligning enterprise strategy with execution for \$MM transformation portfolios

Founder & CTO — Infaqe

01/2021 – Present | Toronto / Lahore

SaaS product company and offshore development arm, scaling from concept to \$50K+ ARR across 20+ clients.

- Built SaaS platform from scratch, scaling to MRR across 20+ non-profit clients
- Founded and led offshore development operation (Lahore), reducing client development costs by 70%
- Standardized CI/CD, access policies, and observability across a 100% remote engineering team

FAHAD QURESHI

Toronto | 647-886-7147 | fahadq@gmail.com | linkedin.com/in/qureshifahad

Director & Head of Business Agility COE — Royal Bank of Canada

06/2018 – 06/2021 | Toronto

Led enterprise-wide organizational transformation and digital adoption across one of Canada's largest banks.

- Led transformation of RBC, driving strategic agility initiatives and digital enablement across 4 divisions
- Implemented agile methodologies resulting in productivity gains exceeding 50% in four key business units
- Facilitated adoption of prioritization and work visualization practices among 20% of RBC executives within two years
- Aligned delivery to business outcomes via Operating Committee-led OKRs

FICC Architect & Agile Adoption — RBC Capital Markets

06/2017 – 06/2018 | Toronto

- Optimized development activities to increase efficiency by 35% through process optimization and tooling integration
- Integrated Jira with Jenkins, Ansible, ELK stack, and automated testing tools for continuous delivery
- Streamlined operations, decreasing downtime and manual efforts for 20 applications by 25%

Director & Regional Head of FX Technology — RBC Capital Markets

10/2016 – 06/2017 | Toronto

- Directed \$22MM budget, achieving \$5MM in vendor cost savings through strategic management
- Generated \$3MM in recurring revenue by increasing deal flow in EM FX forwards
- Modernized FX technology stack and doubled quarterly release cadence via Agile and OKR tracking

Head of FX Technology — BMO Capital Markets

01/2014 – 02/2016 | Toronto

Culmination of 8-year career at BMO, rising from Java Developer to department head.

- Oversaw 60+ professionals and managed \$17MM annual budget across FX trading and operations technology
- Led replacement of IBUK, a legacy operations system from the 1970s, bringing BMO to full CLS (Continuous Linked Settlement) membership
- Modernized the entire FX technology stack by implementing Wall Street Systems 5.0 and bringing in best-of-breed trading systems
- Built custom CRM for FX Sales team, improving client engagement and relationship management
- Automated risk management and eliminated paper-based processes through digitization

Earlier Roles — BMO Capital Markets

01/2008 – 2014 | Toronto

Java Developer (2008) → Team Lead (2010) → Software Development Manager (2012). Built FX trading and operations systems, leading increasingly larger teams through platform modernization. Developed deep domain expertise in FX trading workflows, operations, and settlement processes.
