Toronto | 647-886-7147 | fahadq@gmail.com | linkedin.com/in/qureshifahad

## PROFILE

AI and technology executive with 18+ years leading enterprise transformation, AI/LLM product development, and multi-agent system architecture. Deep hands-on experience building AI workflows, implementing AI-enabled SDLC with Claude Managed Agents, and designing multi-agent applications that deliver measurable business outcomes. Proven track record taking AI products from concept to revenue (\$200K+ ARR), building agentic pipelines on Azure AI Foundry, and operationalizing AI governance.

## COMPETENCIES

**AI & Agents:** AI Workflows | Multi-Agent Systems (LangChain) | Claude Managed Agents & Code | Azure AI Foundry & Logic Apps | Agentic Pipelines | AI-Enabled SDLC | AI Governance (ISO 42001, NIST AI RMF)

**Architecture:** Multi-Cloud (Azure, AWS, GCP) | Node.js, React, Java, Go | Cosmos DB, SQL Server, Firebase | Serverless | API Design

**Delivery:** DevOps & CI/CD | Agile/SAFe/Scrum@Scale | Cost Optimization (50–70%) | Team Building & Offshore Scaling

**Business:** Enterprise Tech Strategy | P&L Management (up to \$22MM) | CapEx/OpEx Optimization | Regulatory Compliance

## EXPERIENCE

### AI Lead Consultant — Digital Era Management & Technology

11/2025 – Present | Toronto

*Leading AI agent development for intercompany reconciliation at a mid-size financial institution.*

- Architected and built AI agents from scratch using a multi-agent model on Azure AI Foundry and Logic Apps
- Designed AI workflows that automate complex intercompany reconciliation, reducing manual effort and improving accuracy
- Embedded with client's team to establish AI-enabled SDLC practices, integrating AI tooling into their development lifecycle

### CTO and Chief Product Owner — Protago

07/2022 – 07/2026 | Montreal

*Data and AI governance platform — built team and product from zero to \$200K+ ARR.*

- Designed and built a multi-agent AI platform using LangChain and LLMs to operationalize regulatory compliance (ISO 42001, NIST AI RMF, EU AI Act) for enterprise clients
- Built an AI initiative intake mechanism with an agentic workflow — multi-agent system that triages risk, routes approvals, and assigns AI projects to the right teams
- Pioneered AI-enabled SDLC using Claude Managed Agents across the entire team — standardizing AI-assisted requirements, design, test generation, and coding for massive team productivity gains
- Led AI governance ensuring AI projects deliver measurable ROI rather than becoming vanity projects
- Reduced deployment costs by 50% on Azure infrastructure and built offshore team reducing monthly expenditure by 50%

### Enterprise Consultant — Manulife / John Hancock

06/2021 – 06/2025 | Boston / Toronto

*Embedded multi-year consulting engagement driving technology strategy transformation for enterprise tech services.*

- Realigned cross-functional fraud prevention efforts at John Hancock, resulting in \$30M+ in annual savings and doubled throughput
- Designed CapEx/OpEx reclassification model using real-time attribution, reclassifying 17% of OpEx to CapEx and eliminating manual timesheets
- Introduced delivery dashboards and agile practices that doubled release velocity and achieved 3x OKR attainment

# FAHAD QURESHI

Toronto | 647-886-7147 | fahadq@gmail.com | linkedin.com/in/qureshifahad

## Founder and CTO — Infaqe

01/2021 – Present | Toronto / Lahore

SaaS platform for non-profit sector plus offshore development services.

- Built product from scratch to \$50K+ ARR serving 20+ non-profit clients with 100% remote engineering team
- Established AI-enabled SDLC using Claude Code and Cursor, mirroring AI-assisted development practices proven at Protago
- Operates offshore development arm delivering 70% cost reduction for clients across AWS, GCP, Azure, and Firebase

## Director & Head of Business Agility COE — Royal Bank of Canada

06/2018 – 06/2021 | Toronto

Led enterprise-wide business agility transformation at one of Canada's largest banks.

- Drove strategic agility initiatives across 4 divisions, achieving 50%+ productivity gains in four key business units
- Facilitated adoption of prioritization and work visualization among 20% of RBC executives within two years
- Aligned technology delivery to business outcomes via OKR-led operating committees

## FICC Architect & Agile Adoption — RBC Capital Markets

06/2017 – 06/2018 | Toronto

- Increased development efficiency by 35% through process optimization and tooling integration (Jira, Jenkins, Ansible, ELK stack)
- Decreased downtime and manual effort for 20 applications by 25%, accelerating time to market

## Director & Regional Head of FX Tech — RBC Capital Markets

10/2016 – 06/2017 | Toronto

- Managed \$22MM budget; achieved \$5MM in vendor cost savings and generated \$3MM in additional recurring revenue
- Replaced outdated infrastructure with modern stack; doubled quarterly release cadence via Agile and OKR tracking

## Head of FX Technology — BMO Capital Markets

01/2014 – 02/2016 | Toronto

Culmination of 8-year career at BMO, rising from Java Developer to department head.

- Oversaw team of 60+ with \$17MM annual budget; replaced IBUK (1970s legacy system), bringing BMO to full CLS membership
- Implemented Wall Street Systems 5.0 and built custom CRM for FX Sales, eliminating paper-based processes

## Earlier Roles — BMO Capital Markets

01/2008 – 2014 | Toronto

Java Developer (2008) → Team Lead (2010) → Software Development Manager (2012). Built FX trading and operations systems, leading increasingly larger teams through platform modernization.

## EDUCATION

**M.A.Sc., Electrical and Computer Engineering** — University of Toronto (2003 – 2006)

**B.A.Sc., Electrical and Computer Engineering** — University of Toronto (1999 – 2003)

## CERTIFICATIONS

DCAM Certified V3 (Data Management) — EDM Council / ISACA | Certified SAFe 4 Program Consultant — Scaled Agile | Certified Scrum@Scale Practitioner — Scrum Inc. | Convolutional Neural Networks in TensorFlow — Coursera | Natural Language Processing in TensorFlow — Coursera
