Profile

Engineering executive with 18+ years leading technology organizations through large-scale reinvention — from Java developer to Head of FX Technology at BMO and Director at RBC, then CTO and founder of two ventures (Prodago, Infaque). Currently an Independent Consultant, hands-on daily shipping production-grade multi-agent AI systems for enterprise clients. Leads strategy-to-execution across remote-first, globally distributed engineering teams of 60+. Expert in AI-native engineering transformation, LLM orchestration, and executive alignment.

Work Experience

Independent Consultant

Self-employed

06/2026 – PRESENT TORONTO, CANADA

- Independent consultant advising enterprises on production-grade multi-agent AI (LangGraph, A2A, OPA): back-testing, guardrails, production monitoring, feedback loops
- Hands-on shipping with AI daily: designed and built AI agents from scratch for intercompany financial reconciliation using Azure AI Foundry and Logic Apps; proved architectures with 3 prototypes incl. a LangGraph + human-in-the-loop pipeline on real call recordings
- Built per-use-case financial models showing $2.8M/yr benefit on a $250K build (11x); scored 5 platform decisions against 6 weighted criteria with guardrail metrics and shadow-mode rollouts
- Built Egility, a culture-fit platform using psycholinguistic NLP, with an AI voice agent for phone surveys

CTO and Chief Product Owner

Prodago.com

07/2022 – 06/2026 MONTREAL, CANADA

- Built the engineering team and AI governance product from scratch, taking the company from $0 to $200K+ ARR
- Pioneered AI-first development with Claude Code across the entire team, standardizing AI-assisted requirements, design, test generation, and coding — massively increasing productivity
- Launched an LLM-powered product operationalizing regulatory compliance frameworks (ISO 42001, NIST AI RMF, EU AI Act)
- Cut deployment costs 50% on Azure infrastructure while improving uptime; reduced dev spend 50%+ via offshore team

Enterprise Consultant

Manulife / John Hancock

06/2021 – 06/2025 BOSTON / TORONTO, USA / CANADA

- Led multi-year tech strategy transformation with OKR-driven portfolio planning
- Realigned fraud prevention efforts at John Hancock, delivering $30M+ in annual savings and doubling throughput
- Designed a CapEx/OpEx reclassification model (17% of OpEx reclassified) that eliminated timesheets

Founder and CTO

Infaque

01/2021 – PRESENT TORONTO, CANADA & LAHORE, PAKISTAN

- Founded non-profit SaaS product company; grew the platform from $0 to $50K+ ARR across 20+ clients
- Built a 100% remote engineering team with standardized CI/CD, access policies, and observability
- Founded the offshore development arm, reducing client development costs by over 70%

Work Experience

Director & Head of Business Agility COE
Royal Bank of Canada
06/2018 – 06/2021 TORONTO, CANADA

- Led enterprise-wide business agility transformation across 4 divisions at one of Canada's largest banks
- Drove adoption of prioritization and work visualization practices among 20% of RBC executives within two years
- Delivered productivity gains exceeding 50% in four key business units

FICC Architect & Agile Adoption
RBC Capital Markets
06/2017 – 06/2018 TORONTO, CANADA

- Increased development efficiency 35% across Fixed Income, Currencies, and Commodities technology
- Integrated Jira with Jenkins, Ansible, ELK stack, and automated testing tools
- Cut downtime and manual effort 25% across 20 applications, accelerating time to market

Director & Regional Head of FX Tech
RBC Capital Markets
10/2016 – 06/2017 TORONTO, CANADA

- Managed a $22MM technology budget with full P&L ownership
- Saved $5MM in vendor expenses and generated $3MM in recurring revenue from EM FX forwards
- Modernized the FX stack and doubled quarterly release cadence via Agile and OKRs

Head of FX Technology
BMO Capital Markets
01/2014 – 02/2016 TORONTO, CANADA

- Led 60+ professionals with a $17MM yearly budget
- Replaced the 1970s-era IBUK operations system and brought BMO to full CLS membership
- Modernized the FX stack on Wall Street Systems 5.0, cutting operations costs

Software Development Manager · Team Lead · Java Developer
BMO Capital Markets
2008 – 2014 TORONTO, CANADA

Education

Electrical and Computer Engineering | Masters of Applied Science and Engineering
University of Toronto
2003 – 2006 TORONTO, CANADA

Electrical and Computer Engineering | Bachelors of Applied Science and Engineering
University of Toronto
1999 – 2003 TORONTO, CANADA
